Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordnolingue et le système d'extraction de Statistique Canada.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606) or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613)951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division.
- **François Bordé**, Chief, Goods & Services Producing Industries Section.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6, ou téléphonez à (613)951-8200.

® Marque déposée de Statistique Canada.

Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix.
- **François Bordé**, Chef, Section des Industries de biens et de services.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48 - 1984.

Highlights

It cost farmers 0.6% more to do business in the first three months of 1996 compared with the previous three months, the lowest first-quarter increase in five years. Prices were significantly lower for feeder cattle, rent and interest costs. Price increases from quarter to quarter were highest for inputs into crop production. Farmers faced higher costs for phosphoric fertilizers (+9.6%) and grain seeds (+6.4%).

Farmers paid more for some animal production inputs such as feed (+10.3%) and broiler chicks (+7.5%) but that was offset significantly by lower costs for feeder cattle (-16.3%). Although farmers faced price increases in supplies and services such as heating fuel and custom work (+1.9%), they benefited from lower interest costs which fell 5.1%. The non-mortgage part contributed most to the decline in the interest component.

On a year-over-year basis, farm input prices rose 2.0% in the first quarter of 1996. This was down substantially from the year-over-year increase of almost 5% recorded in the last three months of 1995. First-quarter figures are the only ones which reflect costs for farm rent and property taxes. Farm rental costs fell 5.0%, while property taxes at the national level rose 2.6%.

Increased costs for seed and fertilizers (+10.9%) again contributed significantly to the 2.0% annual increase in input costs. For the fourth consecutive quarter, farmers enjoyed significantly lower prices for feeder cattle, which tumbled 30.3% on a year-over-year basis. However, this was offset by higher costs for prepared and grain feed (+27.1%).

Again, lower costs for non-mortgage loans helped push down the interest costs on an annual basis (-12.9%). Machinery and motor vehicles rose 4.0% and increased costs for telephone and heating fuel helped push up supplies and services (+3.0%). Farm wages rose 2.2%, while building and fencing fell by a marginal 0.6%.

Prices in Eastern Canada rose 3.8% in the first quarter of 1996 compared with the first quarter of 1995; prices in the West rose a marginal 0.7%. Farmers in Eastern Canada faced price increases in seven of the nine input categories. The higher costs for fertilizer and grain seeds (+8.4%) and for cattle and other animal production costs (+6.8%) contributed most to the first quarter year-over-year increase. Farmers in Eastern Canada also faced increases for property taxes estimated at +4.7% and machinery and motor vehicles (+4.4%) but enjoyed lower interest rates (-13.0%) as a result of lower costs for non-mortgage loans. Farmers paid more to hire farm labour and for supplies and services compared to the same period a year earlier.

In the West, farmers paid more for five inputs categories on a year-over-year basis. Farmers benefited from declining interest costs (-12.7%) and lower prices for inputs to animal production, particularly for cattle which fell 18.9% from the fourth quarter of 1995. The higher cost for electricity helped push up the supplies and services inputs 3.9% and farmers in the West also paid more for farm labour and property taxes. These increases were offset by lower estimated costs for farm rent (-7.2%) and building and fencing.

Faits saillants

Au cours des trois premiers mois de 1996, les coûts d'exploitation des agriculteurs ont monté de 0,6% par rapport aux trois mois précédents. Il s'agit de la plus faible augmentation en cinq ans pour un premier trimestre. Les prix ont diminué considérablement dans le cas des bovins d'engraissement, des loyers et des coûts d'intérêts. Les augmentations de prix trimestrielles ont été les plus fortes pour les entrées dans les cultures agricoles. Les agriculteurs ont eu à composer avec une augmentation du coût des engrais phosphatés (+9,6%) et des semences de céréales (+6,4%).

Les agriculteurs ont payé plus cher certaines entrées dans l'élevage des animaux, comme les aliments pour le bétail (+10,3%) et les poussins à griller (+7,5%), ce qui a par contre été dans une large mesure compensé par la diminution des coûts des bovins d'engraissement (-16,3%). Bien qu'ils aient eu à essuyer des augmentations de prix des fournitures et des services comme le combustible de chauffage et le travail à forfait (+1,9%), les agriculteurs ont profité d'une diminution des coûts d'intérêts, qui ont chuté de 5,1%. La partie non hypothécaire de la composante d'intérêts a représenté le plus clair de la réduction pour les intérêts.

Les prix des entrées dans l'agriculture ont augmenté de 2,0% au premier trimestre de 1996 par rapport au premier trimestre de 1995. C'est nettement plus bas que l'augmentation d'une année à l'autre de près de 5% constatée pour les trois derniers mois de 1995. Les chiffres du premier trimestre sont les seuls qui reflètent les coûts des loyers agricoles et des impôts fonciers. Les coûts des loyers agricoles ont chuté de 5,0%, et les impôts fonciers à l'échelle nationale a monté de 2,6%.

L'augmentation du coût des semences et des engrais (+10,9%) a encore une fois contribué pour beaucoup à l'augmentation annuelle de 2,0% des coûts des entrées. Pour le quatrième trimestre consécutif, les agriculteurs ont profité de prix nettement plus bas pour les bovins d'engraissement, après une dégringolade de 30,3% d'une année à l'autre. Cependant, cela a été annulé par l'augmentation des coûts des aliments préparés et des céréales fourragères (+27,1%).

Encore une fois, la diminution des coûts des prêts non hypothécaires a contribué à faire baisser les coûts d'intérêts, en chiffres annuels (-12,9%). Les prix des machines agricoles et des véhicules automobiles ont progressé de 4,0%, et l'augmentation des coûts du téléphone et du combustible de chauffage a contribué à la hausse des prix des fournitures et des services (+3,0%). Les salaires agricoles ont affiché une hausse de 2,2%, pendant que les prix des bâtiments et des clôtures diminuaient légèrement (-0,6%).

Dans l'Est canadien, les prix ont augmenté de 3,8% au premier trimestre de 1996 par rapport au premier trimestre de 1995; dans l'Ouest, il y a eu une légère augmentation de 0,7%. Les agriculteurs de l'Est canadien ont subi des augmentations de prix dans sept des neuf catégories d'entrées. La hausse du coût des engrais et des semences de céréales (+8,4%) et du coût d'élevage des bovins et d'autres animaux (+6,8%) a été le principal facteur de l'augmentation d'une année à l'autre au premier trimestre. Les agriculteurs de l'Est canadien ont aussi eu à faire face à des augmentations des impôts fonciers (estimées à +4,7%) et des prix des machines agricoles et des véhicules automobiles (+4,4%), mais ils ont profité d'une diminution des taux d'intérêt (-13,0%), à la faveur du recul des coûts des prêts non hypothécaires. Les agriculteurs ont payé plus cher leur main-d'œuvre agricole salariée ainsi que les fournitures et les services par rapport à la même période de l'an dernier.

Dans l'Ouest, les agriculteurs ont vu augmenter les prix de cinq catégories d'entrées, d'une année à l'autre. Les agriculteurs ont profité d'une diminution des frais d'intérêts (-12,7%) et des prix des entrées dans l'élevage des animaux, particulièrement pour les bovins, dont les coûts ont diminué de 18,9% par rapport au quatrième trimestre de 1995. L'augmentation du coût de l'électricité a contribué à l'accroissement de 3,9% des prix des fournitures et des services, et les agriculteurs de l'Ouest ont aussi dû déboursier davantage pour leur main-d'œuvre agricole et leurs impôts fonciers. Ces augmentations ont été compensées par une diminution des coûts estimés pour les loyers agricoles (-7,2%) et les bâtiments et les clôtures.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. d'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years. (2) Selected items. (3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II. (4) In cases where a commodity has two D numbers, the top number is the old D number which is terminated as of first quarter 1994, and the bottom number is the newly assigned number to be used from now on.

(1) The indexes are subject to a two-stage revision. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986 = 100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939 = 100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986 = 100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981 = 100 pour la période allant de 1981 à 1985, sur la base 1971 = 100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961 = 100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939 = 100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

where p_t is the price of an item in the current period, and p_o , q_o and $p_o q_o$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

$$I_{t/o} = \sum \frac{(p_t / p_o) w}{o_u}$$

where

$$W = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item - its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

où p_t est le prix de l'article au cours de la période courante, p_o , q_o et $p_o q_o$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

Exprimé de cette façon, "w" est le poids en pourcentage d'un article - soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'œuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue No. 11-001) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001 au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

For further information

For data only, please contact the information unit at 613-951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at 613-951-3342. The addresses are on the inside front cover of this book.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613-951-3350) ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au 613-951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

(1) As of August 1992, current initial prices are used for wheat and barley in Western Canada.

(1) À partir du mois d'août 1992, les prix initiaux courants sont utilisés pour le blé et l'orge de l'ouest canadien.

TECHNICAL NOTES

FARM PRODUCT PRICE INDEX (1986 = 100)

1. Concepts, Data Description and Methods

Definition and Coverage

The Farm Product Price Index (FPPI), formerly called Index Numbers of Farm Prices of Agricultural Products, measures the change through time in the prices received for agricultural commodities at the first transaction point.

The commodities included in the index are, for the most part, the same commodities that are estimated in the farm cash receipts series published in Agriculture Economic Statistics, Catalogue 21-603. From 1957 to date, the index is based upon products which account for about 95% of total farm cash receipts from farming operations for both the 1960-62 and 1971 weight base period. For years prior to 1957, the index was based upon products which accounted for about 90% of total cash receipts.

Users should note that Newfoundland was not included in the index prior to 1981. As a result, a break in the Canada series occurs in 1981. Nevertheless, Newfoundland's agricultural production is relatively small and the break is not significant.

Data Description and Sources

Much of the price information used in compiling the index is obtained from a monthly survey of farm respondents throughout Canada. Where possible, administrative data are used as price sources in order to reduce response burden. The prices used in computing the index are, as closely as can be determined, the transaction prices received by farmers when ownership first changes hands. These prices include any bonuses and premiums which can be attributed to specific commodities, but they exclude any storage, transportation, processing and handling charges which are deducted before the farmer is paid.

In reporting prices each month, survey respondents are asked to report the average prices prevailing in their neighbourhood, taking into account the various grades of each commodity marketed. Thus, average prices reported by these respondents may differ from month to month as a result of changes in price, changes in quality, or a combination of both. In effect, this index is not a measure of pure price change but a measure of the change in the return to farmers per unit of product marketed.

No adjustment for seasonal variation of prices has been made in the index. Also, the series is subject to revision as more complete and up-to-date data become available. This accounts for any changes between the indexes published in earlier reports and those appearing in the current publication.

NOTES TECHNIQUES

INDICE DES PRIX DES PRODUITS AGRICOLES (1986 = 100)

1. Concepts, description des données et méthodes

Définition et champ d'observation

L'indice des prix des produits agricoles (IPPA), qui était auparavant appelé les nombres-indices des prix à la ferme des produits agricoles, mesure la variation des prix reçus pour les produits agricoles au premier point de transaction.

Les produits figurant dans l'indice sont, à quelques exceptions près, les mêmes que ceux qui figurent dans la série sur les recettes monétaires agricoles publiée dans le bulletin Statistique économiques agricoles, n° 21-603 au catalogue. Pour la période de 1957 à date, l'indice est basé sur les produits qui représentent environ 95% des recettes globales en espèces touchées au cours de la période de base pondérée 1960-62 et 1971. Avant 1957 inclusivement, l'indice était basé sur les prix des produits représentant environ 90% des recettes globales en espèces des cultivateurs.

Comme les chiffres de Terre-Neuve ont été pris en compte dans l'indice en 1981, il se produit une solution de continuité dans la série du Canada à ce moment-là. Cependant, comme la production agricole de cette province n'est pas considérable, cette solution de continuité n'est pas importante.

Description et sources des données

La plupart des renseignements sur les prix utilisés pour la confection de l'indice proviennent des rapports mensuels produits par des correspondants agricoles dans tout le Canada. Les prix utilisés pour calculer l'indice se rapprochent, dans la mesure du possible, des prix obtenus par les agriculteurs au moment de la transaction, lorsque le titre de propriété change de mains pour la première fois. Ces prix comprennent les suppléments et les primes qu'il est possible de rattacher à des produits particuliers, mais non les frais d'entreposage, de transport, de traitement et de manutention qui sont déduits avant que l'agriculteur ne soit payé.

Au moment du rapport mensuel sur les prix, on demande aux correspondants d'indiquer la moyenne des prix en vigueur dans leur voisinage, en tenant compte des diverses qualités de chacun des produits sur le marché. Ainsi, les prix moyens déclarés par ces correspondants peuvent varier d'un mois à l'autre en raison des modifications de prix, des variations de la qualité offerte, ou d'une combinaison de ces deux éléments. En réalité, cet indice ne constitue pas une mesure de la simple variation de prix mais une mesure des variations des recettes des cultivateurs par unité de produit mis en vente.

Aucune rectification de prix n'a été faite pour tenir compte des variations saisonnières. Les séries peuvent subir des modifications à mesure que des données plus détaillées et plus à jour nous parviennent. Ces modifications expliquent les variations existant entre les indices publiés dans les bulletins précédents et les indices figurant dans le présent bulletin.

Weights and Linking

As of March 1990, the index was rebased to 1986=100. The weighting period of 1981-1984 has been maintained, and the commodities included in the index remain unchanged from those included in the 1981=100 index.

When the index was rebased to 1981=100 in December 1986, certain new commodities were added and several old commodities were disaggregated so that more narrowly defined price movements could be followed. Also, with this rebasing, Newfoundland was included in the index beginning in January 1981.

The present index has four weighting periods for approximately 40 years of data. The index has been completely rebased in terms of time, weight, and coverage about every ten years. This ensures that the quantity weights reflect current production patterns. The multi-year weighting period used in the current index provides more representative weights than a single year weighting period. As noted above, the most recent rebasing was in terms of base time period only, as the weighting period and coverage are considered to still be representative of current production patterns.

This index was first published in August 1946 with a time and weight base of 1935-1939=100. In September 1969, the weight base was changed to 1960-1962=100 and the time base to 1961=100. In August 1978, the index was rebased with the time and weight base for the index of 1971=100. In December 1986, the index was rebased with a time base of 1981=100, and a weight base of 1981-1984. In March 1990, the index was again rebased with a time base of 1986=100, and the weight base was unchanged at 1981-1984=100. In each case, a Laspeyres' type (base-weighted) formula was used in calculating the index. Thus, The index expresses current farm prices as a percentage of prices prevailing in the base period.

To provide a measure of continuity, an annual series of linked index numbers on a 1986=100 base is available from 1950 to date. The monthly index has been recalculated using a 1986 time base as far back as January 1981. Annual indexes from 1950 to 1980 are linked to the current time base at January 1981.

Data Availability

Data in this publication are also available on CANSIM Matrix 176. Additional indexes and weighting diagrams are available by contacting the Farm Income and Prices Section, as are the prices used in the calculation of the index.

Pondérations et enchaînement

Depuis mars 1990, la base de l'indice a changé et est maintenant 1986=100. La période de pondération de 1981 à 1984 a été maintenue et les produits compris dans l'indice demeurent les mêmes que ceux de l'indice 1981=100.

Lorsque la base de l'indice est passé à 1981=100 en décembre 1986, quelques nouveaux produits ont été ajoutés et un certain nombre d'anciens produits ont été désagrégés pour permettre de suivre de façon plus précise la variation des prix. De plus, ce changement de base a permis d'inclure Terre-Neuve à partir de janvier 1981.

Le présent indice a quatre périodes de pondération et des données s'échelonnant sur 40 ans. Un changement complet de la base de l'indice (période, pondération et champ) a été effectué tous les 10 ans. Les coefficients de pondération des quantités reflètent bien ainsi les tendances de la production. La période de pondération comptant plusieurs années qui est utilisée pour l'indice actuel donne des coefficients de pondération plus représentatifs qu'une période de pondération ne comptant qu'une seule année. Comme il a été indiqué ci-dessus, le changement de base le plus récent concerne la période de base seulement car il est considéré que la période de pondération et le champ demeurent représentatifs des tendances actuelles de production.

L'indice a été publié pour la première fois en août 1946 sur la base temporelle et pondérée de 1935-1939=100. En septembre 1969, une nouvelle base pondérée a été établie, 1960-1962=100, la base temporelle étant 1961=100. En août 1978, la base de l'indice a été changée, la base temporelle et la base pondérée étant fixées à 1971=100. En décembre 1986, la base temporelle devient 1981=100 et la base pondérée 1981-1984. En mars 1990, la base de l'indice est changée, la base temporelle devenant 1986=100 et la base pondérée demeurant inchangée à 1981-1984=100. Dans chaque cas, la formule de Laspeyre a été utilisée pour le calcul de l'indice. L'indice ainsi produit représente les prix agricoles en cours, en termes de pourcentage des prix en vigueur pendant la période de référence.

Pour assurer une certaine continuité, une série annuelle d'indices raccordés à la base de 1986=100 est disponible pour la période allant de 1950 à ce jour. L'indice mensuel a été calculé de nouveau sur la base de 1986 jusqu'en janvier 1981. Les indices annuels de 1950 à 1980 sont raccordés à la base temporelle actuelle de janvier 1981.

Données disponibles

Les données de la présente publication sont aussi disponibles sur CANSIM dans la matrice 176. Les indices additionnels, les diagrammes de pondération et les prix utilisés dans le calcul de l'indice sont disponibles en s'adressant à la Section du revenu agricole et des prix à la production.

MERCI DE VOTRE COMMANDE!

Pick a topic... any topic

The **1994 Statistics Canada Catalogue** is your guide to the most complete collection of facts and figures on Canada's changing business, social and economic environment. No matter what you need to know, the **Catalogue** will point you in the right direction.

From the most popular topics of the day – like employment, income, trade, and education – to specific research studies – like mineral products shipped from Canadian ports and criminal victimization in urban areas – you'll find it all here.

... the 1994 Statistics Canada Catalogue will help you get your bearings...

The *Catalogue* puts all this information at your fingertips. With the expanded index, you can search by subject, author or title – even periodical articles are indexed. There's also a separate index for all our electronic products.

The *Catalogue* has everything you need to access all Statistics Canada's products:

- descriptions of over 25 new titles, plus succinct abstracts of the over 650 titles and 7 map series already produced;
- a complete guide to finding and using statistics;
- electronic products in a variety of media, and

advice on getting expert assistance on electronic products and on-line searches;

- tabs to each section -- so you can immediately flip to the information you need.

... time and time again

To make sure that the **Catalogue** stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today – you'll be lost without it.

1994 Statistics Canada Catalogue

Only \$15 (plus GST and applicable PST) in Canada (US\$18 in the U.S. and US\$21 in other countries). Quote Cat. no. 11-2040XPE.

Choisissez un sujet... n'importe lequel

Le **Catalogue de Statistique Canada 1994** est votre guide pour la collection la plus complète de faits et de chiffres dans les domaines, en constante évolution, du commerce, de la société et de l'économie du Canada. Peu importe ce que vous voulez savoir, le **Catalogue** vous mettra sur la bonne piste.

Des sujets actuels les plus populaires – comme l'emploi, le revenu, le commerce et l'éducation – à des études de recherche spécialisées – comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines – vous trouverez tout dans ce document.

Le Catalogue de Statistique Canada 1994 vous aidera à vous orienter...

Le *Catalogue* vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre – les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le *Catalogue* a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

- descriptions de plus de 25 nouveaux titres et courts résumés des 650 titres et plus et des 7 séries de cartes déjà disponibles;
- guide complet pour obtenir et utiliser les données statistiques;
- produits électroniques sur supports divers et conseils sur l'obtention d'aide d'experts pour

les produits électroniques et les recherches en direct;

- système d'onglets pour chaque section – pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

... maintes et maintes fois

Pour garantir que le **Catalogue** puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui – vous ne pourrez plus vous en passer.

Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606) or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405

Standards of service to the public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinoilingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences — Permanence of Paper for Printed Library Materials, ANSI Z39.48 — 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada

Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et de services

Le papier utilisé dans la présente publication répond aux exigences minimales de l'«American National Standard for Information Sciences» — «Permanence of Paper for Printed Library Materials», ANSI Z39.48 1984.

Highlights

Prices for seed and feed boosted the total cost of farming by 3.6% in the second quarter of 1996 compared with the same period a year earlier. The increase was especially pronounced in eastern Canada, where input prices were up 5.9%, mostly on the strength of substantially higher prices of inputs for animal production, such as grain feed. Western producers faced an overall increase of 1.8%. That was due in large part to a 6.2% jump in the price of inputs for crop production, namely grain seed and crop insurance. The rising input prices offset a 16.9% national decline in interest costs.

Nationwide, the cost of inputs into animal production rose 8.7% in the second quarter of 1996 compared with the same quarter a year earlier. In particular, grain feed, such as wheat, barley and corn, surged 53.6%, while prepared feed climbed 30.6%. Drought and crop failures in the United States in 1995, and low wheat reserves in Canada and the United States, have put added upward pressure on grain feed prices.

Increased prices for seed, especially for grains and oilseeds (+12.4%) and for crop insurance (+13.5%), helped push up the national crop production index by 5.9%. Also, farmers paid more for farm labour (+7.0%) and for machinery and motor vehicles (+4.0%). On the other hand, farmers saw the cost of non-mortgage loans drop 24.0% compared with a year earlier, while the cost of mortgage loans fell 1.6%. The cost of weanling pigs rose 27.8%, while poultry chicks went up 10.8%. Feeder cattle prices dropped 26.4%.

Eastern farmers paid significantly more for grain feed in the second quarter of 1996 compared with a year earlier, while farmers in the West felt the pinch of higher prices for crop inputs. The jump in grain feed prices in Eastern Canada pushed the annual cost of animal production up 13.9% from the second quarter of 1995. Eastern farmers also faced higher prices for insecticides (+11.2%) and fertilizers (+4.8%). However, farmers in the East experienced lower costs for interest and building and fencing materials compared with the second quarter of 1995.

In the West, farmers paid higher wage rates for farm labour (+9.1%) and higher prices for inputs into crop production (+6.2%) on a year-over-year basis. Higher prices for feed (+27.2%) and poultry chicks (+9.6%) were offset by a drop of 25.5% in feeder cattle prices. Farmers in the West also had lower interest costs and paid less for building and fencing materials.

Farm input prices rose 2.3% between the first and second quarters of 1996, largely due to higher costs of seed and grain feed. This was the highest quarterly increase since the input index rose 2.5% in the first quarter of 1995. Nationwide, farmers paid 4.9% more between the two quarters for all inputs into crop production, including grain and oilseeds (+2.0%), fertilizers (+5.4%) and crop insurance. The cost of crop insurance, which is estimated in the second quarter of each year, rose 13.5% between the quarters.

Higher costs for inputs into animal production (+4.2%) had the largest quarterly impact on farmers. Producers paid more for both grain feed (+15.3%) and prepared feed (+6.7%), but profited from lower costs for feeder cattle (-2.1%). Interest costs fell 4.8% between quarters as a result of lower costs for non-mortgage loans. It was the fourth consecutive quarterly decrease in the interest component.

Faits saillants

Les prix des semences et des aliments pour animaux ont gonflé de 3,6% le coût total de l'exploitation agricole au deuxième trimestre de 1996 par rapport à la période correspondante de l'an dernier. L'augmentation a été particulièrement marquée dans l'Est canadien, où les prix des entrées ont monté de 5,9%, sous l'effet surtout d'une montée appréciable des prix des entrées dans l'élevage d'animaux, comme les céréales fourragères. Les agriculteurs de l'Ouest canadien ont pour leur part subi une augmentation globale de 1,8%, qui est dans une large mesure attribuable à un bond de 6,2% des prix des entrées pour les cultures agricoles, à savoir les semences pour céréales et l'assurance-récolte. Ces augmentations de prix des entrées ont effacé un recul national de 16,9% des coûts d'intérêt.

À l'échelle nationale, les prix des entrées dans l'élevage d'animaux ont monté de 8,7% au deuxième trimestre par rapport au même trimestre de 1995. En particulier, les prix des céréales fourragères, comme le blé, l'orge et le maïs, ont bondi de 53,6%, tandis que ceux des aliments préparés pour animaux ont grimpé de 30,6%. La sécheresse et les mauvaises récoltes dont les États-Unis ont été victimes en 1995 et la faiblesse des réserves de blé du Canada et des États-Unis ont constitué d'autres facteurs d'entraînement des prix des céréales fourragères.

L'augmentation des prix des semences, surtout pour les céréales et les oléagineux (+12,4%), et de l'assurance-récolte (+13,5%) a contribué à la majoration de 5,9% de l'indice des cultures agricoles à l'échelle du pays. De même, les agriculteurs ont payé plus cher la main-d'œuvre agricole salariée (+7,0%) et les machines agricoles et les véhicules automobiles (+4,0%). Par contre, les agriculteurs ont vu le coût des prêts non hypothécaires tomber de 24,0% par rapport à il y a un an, pendant que le coût des prêts hypothécaires fléchissait de 1,6%. Le coût des porcelets sevrés a avancé de 27,8% et celui des poussins, de 10,8%. Les prix des bovins d'engraissement ont baissé de 26,4%.

Les agriculteurs de l'Est ont payé beaucoup plus cher leurs céréales fourragères au deuxième trimestre de 1996 par rapport à un an plus tôt, alors que ceux de l'Ouest n'ont pas échappé à une augmentation des prix des entrées dans les cultures agricoles. Le bond des prix des céréales fourragères dans l'Est canadien a porté le coût annuel de l'élevage d'animaux à 13,9% de plus qu'au deuxième trimestre de 1995. Les agriculteurs de l'Est ont aussi essuyé des augmentations des prix des insecticides (+11,2%) et des engrais (+4,8%). Cependant, les agriculteurs de l'Est ont profité d'une diminution des coûts d'intérêt et des matériaux pour bâtiments et clôtures par rapport au deuxième trimestre de 1995.

Dans l'Ouest, les agriculteurs ont payé des taux salariaux plus élevés pour la main-d'œuvre agricole (+9,1%) et des prix plus hauts pour les entrées dans les cultures agricoles (+6,2%) par rapport à la même période l'an dernier. La hausse des prix des aliments pour animaux (+27,2%) et des poussins (+9,6%) a été effacée par une baisse de 25,5% des prix des bovins d'engraissement. Les agriculteurs de l'Ouest ont aussi payé moins cher pour ce qui est de l'intérêt et des matériaux pour les bâtiments et les clôtures.

Les prix des entrées dans l'agriculture ont augmenté de 2,3% entre le premier et le deuxième trimestre de 1996, essentiellement à cause de la hausse des coûts des semences et des céréales fourragères. C'est la plus forte augmentation trimestrielle depuis que l'indice des prix des entrées a gagné 2,5% au premier trimestre de 1995. À l'échelle nationale, les agriculteurs ont payé 4,9% de plus entre les deux trimestres pour toutes les entrées dans les cultures agricoles, y compris les céréales et les oléagineux (+2,0%), les engrais (+5,4%) et l'assurance-récolte. Le coût de l'assurance-récolte, qui est estimé au deuxième trimestre de chaque année, a monté de 13,5% entre les trimestres.

Cependant, c'est l'augmentation des coûts des intrants dans l'élevage d'animaux (+4,2%) qui a eu la plus forte incidence trimestrielle sur les agriculteurs. Les producteurs ont payé plus cher les céréales fourragères (+15,3%) et les aliments préparés pour animaux (+6,7%), mais ont profité d'une diminution des coûts pour le bétail d'engraissement (-2,1%). Les coûts en intérêt ont reculé de 4,8% entre les trimestres, en raison d'une baisse des coûts des prêts non hypothécaires. C'était la quatrième diminution trimestrielle consécutive de la composante de l'intérêt.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(2) Selected items.

(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) Certains items.

(3) Les groupes et sous-groupes de produits sont identifiés par le type de caractères d'imprimerie et par l'espacement. Pour plus d'explications, veuillez voir les appendices I ou II.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

NOTES TECHNIQUES

FARM INPUT PRICE INDEX (1986=100)

INDICE DES PRIX DES ENTRÉES DANS
L'AGRICULTURE (1986=100)

1. Concepts, Data Description and Methods

1. Concepts, description des données et méthodes

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Index formula

Formule de l'indice

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

$$I_{t/0} = \frac{\sum p_t q_o}{\sum p_o q_o} \times 100$$

where p_t is the price of an item in the current period, and p_o , q_o and $p_o q_o$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

où p_t est le prix de l'article au cours de la période courante, p_o , q_o et $p_o q_o$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$l_{t/0} = \sum (p_t/p_o)w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en œuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

Canada

Pick a topic... any topic

The **1994 Statistics Canada Catalogue** is your guide to the most complete collection of facts and figures on Canada's changing business, social and economic environment. No matter what you need to know, the **Catalogue** will point you in the right direction.

From the most popular topics of the day – like employment, income, trade, and education – to specific research studies – like mineral products shipped from Canadian ports and criminal victimization in urban areas – you'll find it all here.

... the 1994 Statistics Canada Catalogue will help you get your bearings...

The **Catalogue** puts all this information at your fingertips. With the expanded index, you can search by subject, author or title – even periodical articles are indexed. There's also a separate index for all our electronic products.

The **Catalogue** has everything you need to access all Statistics Canada's products:

- descriptions of over 25 new titles, plus succinct abstracts of the over 650 titles and 7 map series already produced;

- a complete guide to finding and using statistics;

- electronic products in a variety of media, and

advice on getting expert assistance on electronic products and on-line searches;

tabs to each section -- so you can immediately flip to the information you need.

... time and time again

To make sure that the **Catalogue** stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today – you'll be lost without it.

1994 Statistics Canada Catalogue

Choisissez un sujet... n'importe lequel

Le **Catalogue de Statistique Canada 1994** est votre guide pour la collection la plus complète de faits et de chiffres dans les domaines, en constante évolution, du commerce, de la société et de l'économie du Canada. Peu importe ce que vous voulez savoir, le **Catalogue** vous mettra sur la bonne piste.

Des sujets actuels les plus populaires – comme l'emploi, le revenu, le commerce et l'éducation – à des études de recherche spécialisées – comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines – vous trouverez tout dans ce document.

Le Catalogue de Statistique Canada 1994 vous aidera à vous orienter...

Le **Catalogue** vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre – les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le **Catalogue** a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

- descriptions de plus de 25 nouveaux titres et courts résumés des 650 titres et plus et des 7 séries de cartes déjà disponibles;

- guide complet pour obtenir et utiliser les données statistiques;

- produits électroniques sur supports divers et conseils sur l'obtention d'aide d'experts pour

les produits électroniques et les recherches en direct;

système d'onglets pour chaque section – pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

... maintes et maintes fois

Pour garantir que le **Catalogue** puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui – vous ne pourrez plus vous en passer.

Agriculture Statistics at work for you

Did you know that Statistics Canada's **Agriculture Division** provides many of its clients with **special services** tailor-made to meet their unique data requirements? Agriculture Division has a variety of information sources at its fingertips that can be used to provide you with **the data you need to make important decisions as an agri-business specialist**.

SPECIAL TABULATIONS

Looking for specific agriculture data to help in your day-to-day work? Agriculture Division can provide you with customized tables and reports that give you the data you require. You can pick and choose the variables from one or more of our databases and receive them in a format that **best suits your needs**.

ANALYTICAL STUDIES

Require in-depth analysis of the data that affect your industry or market? Agriculture Division's specialized team of professionals has the hands-on experience in data analysis **you want working for you**.

CUSTOM SURVEYS

Do you need information that no one has but you don't know how to get it? Agriculture Division can conduct a special survey or expand on an existing one **just for you**.

Find out for yourself what many agriculture professionals have known for years — Statistics Canada has the know-how and expertise to get the job done!

Les statistiques agricoles à votre service

Saviez-vous que la **Division de l'agriculture** de Statistique Canada fournit à un grand nombre de ses clients des **services spéciaux** qui sont adaptés à leurs besoins en matière de données? La Division puise à même une vaste gamme de renseignements pour vous fournir **les données qu'il vous faut pour prendre des décisions importantes en tant que spécialiste de l'agroalimentaire**.

TOTALISATIONS SPÉCIALES

Vous cherchez des données précises sur l'agriculture pour vous aider dans votre travail quotidien? La Division de l'agriculture peut vous fournir des tableaux et des rapports personnalisés qui renferment les données requises. Vous pouvez choisir les variables qui vous intéressent à partir de l'une ou plusieurs de nos bases de données et recevoir les totalisations sous la forme **qui répond le mieux à vos besoins**.

ÉTUDES ANALYTIQUES

Vous voulez une analyse approfondie des données qui touchent votre industrie ou votre marché? L'équipe de spécialistes de la Division de l'agriculture possède l'expérience pratique de l'analyse des données **dont vous avez besoin**.

ENQUÊTES PERSONNALISÉES

Vous voulez des renseignements inédits mais vous ne savez pas comment les obtenir? La Division de l'agriculture peut mener une enquête spéciale ou élargir la portée d'une enquête existante, **uniquement pour vous**.

Ne ratez pas l'occasion de découvrir ce que bien des professionnels du domaine de l'agriculture savent depuis des années - Statistique Canada

Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Standards of service to the public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinaire et le système d'extraction de Statistique Canada.

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^p preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject of a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^p nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada

Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et de services

Le papier utilisé dans la présente publication répond aux exigences minimales de l'«American National Standard for Information Sciences» – «Permanence of Paper for Printed Library Materials», ANSI Z39.48 1984.

Highlights

Farm Input Price Index

Third Quarter 1996

Eastern Canadian farmers, particularly those who raise animals, have faced substantially higher costs of doing business over the past 12 months. In the third quarter of 1996, farm input prices in the East rose 7.8% over the same period in 1995. By comparison, in Western Canada, prices were up only 2.8% over the third quarter of 1995.

The higher costs in the East were the result of substantial price increases for grain feed (wheat, corn, oats and barley) and higher costs for certain young animals such as weanling pigs, which hog producers purchase to fatten for the market.

Year-over-year increases in input prices have been significantly larger for Eastern farmers than for their counterparts in the West for the past four quarters.

Overall, the cost of doing business for Canadian farmers went up 5% in the third quarter of 1996, compared with the same quarter a year ago. This was the highest annual rate of increase since the third quarter of 1993, when it was 5.1%. The increase occurred despite a 16.6% drop in interest costs.

Costs of inputs into animal production rose significantly

Canadian farmers who raise livestock faced significant increases in their costs in the third quarter of 1996, compared with the same three months last year. With the exception of prices for feeder cattle, which declined 14.4%, farmers paid more on a national basis for all inputs into animal production. Higher prices for weanling pigs (+38.9%), broiler chicks (+23.5%) and grain feed (+36.7%) contributed the most to the annual increase.

Farmers paid more for phosphoric fertilizers (+6.7%), which helped drive the national crop production index up 5.7%, compared with the same period a year earlier.

Farmers also faced higher prices for machinery and motor vehicles (+3.7%) and building and fencing (+4.8%), due mostly to higher prices for lumber.

On the other hand, they benefited from lower interest costs, down 16.6% from the year before, due to falling rates for non-mortgage loans (-23.9%).

Costs rose significantly for Eastern farmers

Eastern Canadian farmers, who absorbed the lion's share of price increases in the third quarter, paid 45.2% more for grain feed and 43.4% more for weanling pigs, compared with a year earlier. In fact, they faced increases in six of seven input categories.

Faits saillants

Indice des prix des entrées dans l'agriculture

Troisième trimestre de 1996

Les agriculteurs de l'Est canadien, et particulièrement les éleveurs, ont subi une augmentation importante de leurs coûts d'exploitation au cours des 12 derniers mois. Au troisième trimestre, les prix des entrées dans l'agriculture dans l'Est ont monté de 7,8% par rapport à la période correspondante de 1995. Par comparaison, dans l'Ouest canadien, la progression n'a été que de 2,8% par rapport au troisième trimestre de 1995.

L'augmentation des coûts dans l'Est est le résultat de hausses appréciables des prix des céréales fourragères (blé, maïs, avoine et orge) et d'une avance des coûts pour certains jeunes animaux, comme les porcelets sevrés, que les producteurs de porcs achètent pour les engraisser pour le marché.

L'augmentation d'une année à l'autre des prix des intrants a été nettement plus marquée pour les agriculteurs de l'Est que pour leurs homologues de l'Ouest au cours des quatre derniers trimestres.

Au total, le coût d'exploitation des agriculteurs canadiens a monté de 5% au troisième trimestre de 1996 par rapport au trimestre correspondant d'il y a un an. C'est le plus fort taux annuel d'augmentation depuis le troisième trimestre de 1993, où la progression avait été de 5,1%. L'augmentation est survenue malgré une chute de 16,6% des coûts d'intérêt.

Progression importante des coûts des intrants dans l'élevage d'animaux

Les agriculteurs canadiens qui élèvent du bétail ont vu leurs coûts augmenter considérablement au troisième trimestre de 1996 par rapport au même trimestre de l'an dernier. À l'exception des prix des bovins d'engraissement, qui ont échi de 14,4%, les agriculteurs ont payé plus cher, à l'échelle nationale, tous les intrants dans l'élevage d'animaux. L'avance des prix des porcelets sevrés (+38,9%), des poussins pour grill (+23,5%) et des céréales fourragères (+36,7%) a été le principal facteur de la progression annuelle.

Les agriculteurs ont payé plus cher les engrais phosphoriques (+6,7%), ce qui a contribué à faire avancer de 5,7% l'indice national des cultures agricoles par rapport à la même période de l'année précédente.

Les agriculteurs ont aussi essuyé des hausses de prix pour les machines agricoles et les véhicules automobiles (+3,7%) et les bâtiments et les clôtures (+4,8%), essentiellement à cause de la hausse des prix du bois de construction.

Par ailleurs, ils ont profité d'une baisse des coûts d'intérêt, qui ont dégringolé de 16,6% d'une année à l'autre, à la faveur d'une diminution des coûts des prêts non hypothécaires (-23,9%).

Nette progression des coûts pour les agriculteurs de l'Est

Les agriculteurs de l'Est canadien, qui ont absorbé la part du lion des augmentations de prix au troisième trimestre, se sont vu eniger des hausses de prix de 45,2% pour les céréales fourragères et de 43,4% pour les porcelets sevrés par rapport à l'année précédente. De fait, ils ont subi des augmentations dans six des sept catégories d'intrants.

Increased prices for building materials (+9.2%) in the East contributed the most to the increase in building and fencing, while higher prices for insecticides (+11.0%) and phosphoric fertilizers (+9.5%) helped push the annual crop production index up 4.6%. Hired farm labour costs rose 3.4% and costs for supplies and services, such as heating fuel and custom work, were up 2.4%.

However, farmers in the East paid 16.9% less for interest, as a result of lower costs for non-mortgage loans.

In the West, where the overall annual price hike was more moderate, farmers also experienced price increases in six of the seven input categories. They faced higher prices for inputs into animal production (+7.3%) and crop production (+6.3%).

Western farmers also benefited from lower interest costs, which fell 16.2% compared with the third quarter of 1995.

Higher costs for animal production inputs pushed up quarterly increase

Nationally, farm inputs rose 1.5% between the second and third quarters of 1996, but it was Eastern farmers who again experienced the highest increases. Input costs rose 2.4% in the East, compared with 0.7% in the West.

Although prices for grain feed declined 1.0% nationally from the second to the third quarter, farmers paid more for all other inputs into animal production (+5.9%).

Prices declined in four of the seven input categories. There were no price changes for inputs into crop production compared with the second quarter of 1996. It was the first time since the fourth quarter of 1995 that farmers did not face price increases for fertilizers and pesticides.

Higher prices for building materials contributed to a 3.2% price hike for building and fencing. However, interest costs fell for the fifth straight quarter (-4.2%).

L'augmentation des prix des matériaux de construction (+9,2%) dans l'Est a été le principal facteur de la hausse des prix des bâtiments et des clôtures, tandis que l'avance des prix des insecticides (+11,0%) et des engrais phosphoriques (+9,5%) a contribué à propulser de 4,6% l'indice annuel des cultures agricoles. Les coûts de la main-d'œuvre agricole salariée ont monté de 3,4%, et ceux des fournitures et des services, comme le combustible de chauffage et le travail sur commande, de 2,4%.

Cependant, les agriculteurs de l'Est ont vu leurs coûts d'intérêt échoir de 16,9% à la faveur d'une chute des coûts des prêts non hypothécaires.

Dans l'Ouest, où la hausse annuelle globale des prix a été plus modeste, les agriculteurs ont aussi essuyé des augmentations de prix dans six des sept catégories d'intrants. Ils se sont vu imposer des prix plus élevés pour les intrants dans l'élevage d'animaux (+7,3%) et les cultures agricoles (+6,3%).

Les agriculteurs de l'Ouest ont aussi profité du recul des coûts d'intérêt, qui sont tombés de 16,2% comparativement au troisième trimestre de 1995.

L'avance des coûts des intrants dans l'élevage d'animaux a propulsé l'augmentation trimestrielle

À l'échelle nationale, les intrants dans l'agriculture ont subi une hausse de 1,5% entre les deuxième et troisième trimestres de 1996, mais ce sont les agriculteurs de l'Est qui ont, encore une fois, essuyé les augmentations les plus marquées. Les coûts des intrants ont augmenté de 2,4% dans l'Est, et de 0,7% dans l'Ouest.

Bien que les prix des céréales fourragères se soient repliés de 1,0% au niveau national entre les deuxième et troisième trimestres, les agriculteurs ont payé plus cher tous leurs autres intrants dans l'élevage d'animaux (+5,9%).

Les prix se sont repliés dans quatre des sept catégories d'intrants. Il n'y a pas eu de variations de prix pour les intrants dans la production agricole par rapport au deuxième trimestre de 1996. C'est la première fois depuis le quatrième trimestre de 1995 que les agriculteurs ne subissent pas d'augmentations de prix des engrais et des pesticides.

La hausse des prix des matériaux de construction a contribué à une avance de prix de 3,2% pour les bâtiments et les clôtures. Cependant, les coûts d'intérêt ont chuté pour un cinquième trimestre d'affilée (-4,2%).

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(2) Selected items.

(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

where p_t is the price of an item in the current period, and p_0 , q_0 and $p_0 q_0$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_0 , q_0 et $p_0 q_0$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$I_{t/0} = \sum (p_t / p_o)^w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en œuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

Don't let the changing world
take you by surprise!

Ne soyez pas dépassé
par les événements!

An aging population. Lone-parent families. A diverse labour force. Do you know how today's social changes will affect your future ... your organization ... and your family?

Keep pace with the dramatic shifts in Canada's evolving social fabric with Statistic Canada's best-selling quarterly, *Canadian Social Trends*. With vast and varied reports on major changes in key social issues and trends, this periodical incorporates findings from over 50 national surveys.

Written by some of Canada's leading-edge social analysts, *Canadian Social Trends* combines painstaking research with dynamic prose on topics like **ethnic diversity, low-income families, time-crunch stress, violent crime** and much more — all in a colourful, easy-to-read, magazine format.

A lasting record of changing times!

Join the thousands of business and policy analysts, social-science professionals, and academics who trust *Canadian Social Trends* to demystify the causes and consequences of change in Canadian society. Don't miss a single issue — subscribe today.

Canadian Social Trends (catalogue number 11-0080XPE) is \$34 (plus GST and applicable PST) annually in Canada, US\$41 in the United States and US\$48 in other countries.

Le vieillissement de la population.

Les familles monoparentales. La diversification de la population active. Savez-vous comment les changements sociaux d'aujourd'hui vont se répercuter sur votre avenir, votre organisation, votre famille?

Suivez l'évolution spectaculaire de la société canadienne grâce à *Tendances sociales canadiennes*, une publication trimestrielle de Statistique Canada. Avec des articles vastes et variés sur les principaux changements caractérisant les questions et les tendances sociales principales, cette publication intègre les résultats de plus de 50 enquêtes nationales.

Certains des analystes sociaux les plus reconnus du Canada rédigent des articles dans *Tendances sociales canadiennes*. Ils présentent les résultats de recherches minutieuses dans un style attrayant pour des sujets tels que **la diversité ethnique, les familles à faible revenu, le stress dû au manque de temps, le crime** et bien d'autres encore dans une revue haute en couleur et de lecture aisée.

Un dossier permanent d'une époque en évolution!

Des milliers d'analystes des entreprises et des politiques, de professionnels des sciences sociales et d'universitaires lisent *Tendances sociales canadiennes* pour identifier les causes et les conséquences de l'évolution de la société canadienne. Ne manquez pas un numéro, abonnez-vous dès aujourd'hui.

L'abonnement annuel à *Tendances sociales canadiennes* (n° 11-0080XPF au catalogue) coûte 34 \$ (plus la TPS et la TVP en vigueur) au Canada, 41 \$ US aux États-Unis et 48 \$ US dans les autres pays.

To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard. Via Internet: order@statcan.ca

Pour passer votre commande, écrivez à Statistique Canada, Division des Opérations et de l'intégration, Direction de la circulation, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au centre de services-conseils de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication.

Vous pouvez aussi envoyer votre commande par télécopieur, au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard. Via l'Internet: order@statcan.ca

Don't let this happen to you!

Ne vous laissez pas dépasser par les événements!

Imagine you're called upon to make a really important business decision. You spend some anxious days weighing your options. You examine the available data. Finally, you make your decision...

...only to discover too late that your information was incomplete or outdated!

If you've ever experienced this type of frustration... or if your reputation ever depends on the quality of the data you refer to... **Infomat** is for you.

Infomat is your fastest and easiest way to keep on top of important Canadian economic and social trends. Since it comes to you weekly – not daily – issues won't pile up unread. And, in just one publication, you'll have the answers to almost anything:

- ✓ price indexes
- ✓ manufacturing shipments and orders
- ✓ imports and exports
- ✓ labour market conditions, and
- ✓ dozens of key social and economic indicators!

And because **Infomat** is based on over 100 ongoing Statistics Canada surveys, no other source is more timely or more reliable.

Infomat is specially designed and written for you – a busy manager with no time to waste!

Join the confident, successful decision-makers in the country and subscribe to Infomat today!

Infomat (catalogue no. 11-0020XPE) is only \$140* per year in Canada, US\$168 in the U.S. and US\$196 in other countries. Also available by Fax Service: 50 issues for \$600* in Canada, US\$600 in the U.S. and US\$600 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR FAX (613) 951-1584 and use your VISA or MasterCard.

OR MAIL your order to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.
Via Internet: order@statcan.ca *plus GST and applicable PST

Imaginez que vous devez prendre une décision de gestion très importante. Vous vous faites du mauvais sang pendant quelques jours à évaluer vos options. Vous examinez les données disponibles. Vous vous décidez enfin...

... pour vous rendre compte trop tard que vous vous êtes fondé sur de l'information incomplète ou périmée!

Si vous avez déjà vécu ce genre de situation... ou si vous devez un jour miser votre réputation sur la qualité des données que vous avancez...

Infomat est pour vous.

Infomat est la façon la plus rapide et la plus facile de se tenir au courant des tendances économiques et sociales importantes au Canada. Comme il s'agit d'un hebdomadaire – non d'un quotidien – vous aurez le temps de le lire. Et dans une seule et même publication, vous trouverez réponse à presque tout :

- ✓ indices de prix
- ✓ livraisons et commandes des fabricants
- ✓ importations et exportations
- ✓ situation du marché du travail, et des
- ✓ dizaines d'indicateurs socio-économiques clés!

Et comme **Infomat** est fondé sur plus de 100 enquêtes permanentes de Statistique Canada, aucune autre source n'est plus à jour ou plus fiable.

Infomat est conçu et rédigé pour des gens comme vous – des gestionnaires qui n'ont pas de temps à perdre!

Faites comme bien d'autres décideurs au pays qui ont réussi et abonnez-vous à Infomat aujourd'hui même!

Infomat (n° 11-0020XPE au catalogue) ne coûte que 140 \$* par année au Canada, 168 \$ US aux États-Unis et 196 \$ US dans les autres pays. Nous vous offrons également le service de télécopie : 50 numéros pour 600 \$* au Canada, 600 \$ US aux États-Unis et 600 \$ US dans les autres pays.

Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), (fax (613) 951-2848), Internet: shadsan@stacan.ca or to the Statistics Canada Regional Reference Centre in:

Standards of service to the public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolinguage et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^p preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^p nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Highlights

Farm input price index

Fourth quarter 1996

Farmers got a substantial break on farm input prices between the third and fourth quarters of 1996. Declining prices for feed and seed, as well as lower interest costs, drove input prices down 2.4%, the largest quarterly drop in the Farm Input Price Index since it began in 1961.

However, it still cost farmers 2.3% more to do business in the fourth quarter of 1996 than in the same quarter of 1995, despite a 19.4% drop in interest costs. But the year-over-year increase was down significantly from the 5.0% rise recorded in the third quarter of 1996.

Eastern Canadian farmers incurred larger price increases for the fifth straight quarter. Their input prices were up 3.2% compared to the same period a year earlier, the result of higher prices for seed and feed. By comparison, western producers faced an overall year-over-year increase of 1.6%, as seed prices rose 8.0% and pesticide prices went up 2.1%.

First quarterly drop in prices in two years

The drop in input prices between the third and fourth quarters of 1996 was the first decline since the fourth quarter of 1994.

Compared with the third quarter of 1996, lower prices for feed (-11.5%), weanling pigs (-4.2%), and poultry chicks (-7.3%) contributed most to the decrease in animal production (-6.9%). Farmers also experienced lower prices for fertilizers, in particular for nitrogen fertilizers (-10.0%) and phosphoric fertilizers (-7.5%). These helped push the crop production index down 3.8%. Farmers continued to pay less for interest (-7.0%), as a result of lower costs for non-mortgage loans.

However, prices rose in the remaining input categories in the fourth quarter. Supplies and services went up 1.3%, due to higher prices for heating fuel, while higher prices for diesel fuel and automobiles pushed machinery and motor vehicles up 1.7%.

Seed and feed costs contributed to annual increase

Nationwide, the jump in prices for inputs into animal production (+4.8%) contributed most to the year-over-year increase. Producers paid more for weanling pigs (+25.1%), broiler chicks (+9.4%) and prepared feed (+11.5%), but profited from lower prices for cattle, down 7.9% compared with the same period a year earlier.

Faits saillants

Indice des prix des entrées dans l'agriculture

Quatrième trimestre de 1996

Les agriculteurs ont eu droit à une baisse importante des prix des entrées dans l'agriculture entre les troisième et quatrième trimestres de 1996. La diminution des prix des semences et des aliments pour animaux, conjuguée au repli des coûts d'intérêt, a fait reculer les prix des entrées de 2,4%. Il s'agit du plus fort repli trimestriel de l'indice des prix des entrées dans l'agriculture depuis ses débuts en 1961.

Toutefois, les coûts d'exploitation des agriculteurs ont quand même été de 2,3% plus élevés au quatrième trimestre de 1996 par rapport au même trimestre en 1995, malgré un repli de 19,4% des coûts d'intérêt. Mais l'augmentation d'une année à l'autre a été nettement plus faible que la progression de 5,0% constatée au troisième trimestre de 1996.

Pour un cinquième trimestre d'affilée, les agriculteurs de l'Est canadien ont dû faire face à de plus fortes augmentations de prix. Les prix des entrées ont augmenté de 3,2% par rapport à la période correspondante en 1995, à cause d'une hausse du prix des semences et des aliments pour animaux. Par comparaison, les producteurs de l'Ouest ont fait face à une progression globale de 1,6%, les prix des semences ayant monté de 8,0% et ceux des pesticides, de 2,1%.

Première baisse trimestrielle des prix en deux ans

La chute des prix des entrées dans l'agriculture entre les troisième et quatrième trimestres de 1996 a constitué le premier recul depuis le quatrième trimestre de 1994.

Les baisses du prix des aliments (-11,5%), des porcelets sevrés (-4,2%) et des poussins (-7,3%) ont contribué le plus à la diminution de la production animale (-6,9%) par rapport au troisième trimestre de 1996. Les agriculteurs ont aussi profité de baisses de prix des engrais, en particulier des engrais azotés (-10,0%) et des engrais phosphoriques (-7,5%). Ces prix ont contribué à un fléchissement de 3,8% de l'indice des cultures agricoles. Les agriculteurs ont continué de payer moins en intérêt (-7,0%), en raison de la diminution du coût des prêts non hypothécaires.

Cependant, les prix ont augmenté dans les autres catégories d'entrées au quatrième trimestre. Le prix des fournitures et des services a progressé de 1,3%, sous l'effet de hausses du prix du combustible de chauffage. Par ailleurs, la majoration des prix du carburant diesel et des automobiles a fait augmenter de 1,7% les prix des machines agricoles et des véhicules automobiles.

Les coûts des semences et des aliments pour animaux ont contribué à l'augmentation annuelle

À l'échelle nationale, le bond des prix des entrées dans la production animale (+4,8%) a été le principal facteur de l'augmentation d'une année à l'autre. Les producteurs ont payé plus cher les porcelets sevrés (+25,1%), les poussins pour grill (+9,4%) et les aliments préparés (+11,5%), mais ont profité d'une baisse du prix des bovins, qui s'est replié de 7,9% par rapport à la période correspondante en 1995.

Farmers again faced price increases for inputs into crop production (+4.5%). In particular, grains and oilseeds rose 7.7% and farmers paid more for phosphoric fertilizers (+5.7%) on a year-over-year basis.

Higher prices for heating fuel and custom work contributed most to a 4.7% annual increase in supplies and services. Farmers also faced higher prices for building and fencing (+5.7%) and for petroleum products, such as diesel fuel and gasoline, which pushed the index for machinery and motor vehicles up 4.3% from the fourth quarter of 1995.

On the other hand, farmers saw the index for non-mortgage interest drop 28.3% compared with a year earlier, while the index for mortgage interest fell 2.4%.

Prices for weanling pigs higher for eastern farmers

Higher prices for weanling pigs (+27.7%) and broiler chicks (+9.1%) in the East contributed most to the increase in animal production (+5.6%) on an annual basis. In fact, farmers in the East faced price increases in all input categories surveyed in the fourth quarter except for interest, which fell as a result of lower costs for non-mortgage loans (-27.9%).

In the West, where the overall annual price increase was much less, farmers also experienced price increases in six of the seven input categories that were surveyed in the fourth quarter. Western farmers paid higher prices for electricity (+6.9%), seeds (+8.0%) and weanling pigs (+13.9%). However, they also benefited from lower costs for non-mortgage loans, which tumbled 28.7% compared with the same period a year earlier.

Les agriculteurs ont encore une fois fait face à des augmentations de prix des entrées dans les cultures agricoles (+4,5%). En particulier, les céréales et les graines oléagineuses ont affiché des hausses de 7,7%, et les agriculteurs ont payé plus cher les engrais phosphoriques (+5,7%) par rapport à l'année précédente.

Les augmentations de prix du combustible de chauffage et du travail sur commande ont été les principaux facteurs d'une augmentation annuelle de 4,7% du prix des fournitures et des services. Les agriculteurs ont aussi eu à composer avec des augmentations de prix pour les bâtiments et les clôtures (+5,7%) et pour les produits du pétrole, comme le carburant diesel et l'essence, qui ont relevé l'indice des machines agricoles et des véhicules automobiles de 4,3% depuis le quatrième trimestre de 1995.

Par contre, les agriculteurs ont observé une baisse de 28,3% de l'indice de l'intérêt non hypothécaire par rapport à la même période de l'année précédente, tandis que l'indice de l'intérêt hypothécaire a fléchi de 2,4%.

Les porcelets sevrés ont coûté plus cher aux agriculteurs de l'Est

Les augmentations de prix des porcelets sevrés (+27,7%) et des poussins de grill (+9,1%) dans l'Est ont été les principaux facteurs de l'accroissement des prix de la production animale (+5,6%), en chiffres annuels. De fait, les agriculteurs de l'Est ont essuyé des augmentations de prix dans toutes les catégories d'entrées qui ont été observées au quatrième trimestre de 1996, sauf l'intérêt, qui a chuté à la faveur d'une diminution des coûts des prêts non hypothécaires (-27,9%).

Dans l'Ouest, où l'augmentation annuelle des prix a été bien moindre au niveau d'ensemble, les agriculteurs ont aussi observé des augmentations de prix dans six des sept catégories d'entrées observées au quatrième trimestre de 1996. Les agriculteurs de l'Ouest ont payé plus cher l'électricité (+6,9%), les semences (+8,0%) et les porcelets sevrés (+13,9%). Ils ont par ailleurs profité d'une baisse des coûts des prêts non hypothécaires, qui ont chuté de 28,7% par rapport à la même période de l'année précédente.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(2) Selected items.

(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) Certains items.

(3) Les groupes et sous-groupes de produits sont identifiés par le type de caractères d'imprimerie et par l'espacement. Pour plus d'explications, veuillez voir les appendices I ou II.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

where p_t is the price of an item in the current period, and p_0 , q_0 and $p_0 q_0$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_0 , q_0 et $p_0 q_0$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$l_{i/0} = \sum (p_i / p_o) w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'œuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

THANK YOU FOR YOUR ORDER!

Statistics Canada Statistique Canada

Canada

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistics Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts – names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue no. 10-2300XPB) is \$220 (plus GST and applicable PST) annually in Canada, US\$260 in the United States and US\$310 in other countries. Highlights of the *Canadian Composite Leading Indicator* (catalogue no. 11F0008XFE) are available by fax – the same day of release – for \$70 annually in Canada and US\$70 in the United States.

To order, write to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Via Internet: order@statcan.ca

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique** annuel à titre gracieux.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-2300XPB au catalogue) est de 220 \$ (plus la TPS et la TVP en vigueur) au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays. Les faits saillants de l'*Indicateur composite avancé* (n° 11F0008XFF au catalogue) sont offerts par télécopieur – le jour même de leur parution – pour 70 \$ par année au Canada et 70 \$ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division des Opérations et de l'intégration, Direction de la circulation, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard. Identify Emerging Trends

Define New Markets

Pinpoint Profit Opportunities

Dégagez les nouvelles tendances

Définissez les nouveaux marchés

Déterminez les possibilités de profit

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an in-depth analysis of Canadian industries, the **Market Research Handbook** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- ▶ how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
 - ▶ the level of sales in retail chain and department stores;
 - ▶ what goods are being traded between Canada, U.S., and other countries;
 - ▶ census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration
- ...and much, much more!

With over 600 pages, the **Handbook** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the **Market Research Handbook** (Catalogue #63-2240XPB) today for only \$110 in Canada plus \$7.70 GST and applicable PST, US\$132 in the United States, and US\$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR FAX (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication. Via Internet: order@statcan.ca

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le **Recueil statistique des études de marché** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- ▶ les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
 - ▶ le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
 - ▶ les biens échangés entre le Canada, les É.-U. et d'autres pays;
 - ▶ les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale
- ...et bien plus encore!

Le **Recueil**, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du **Recueil statistique des études de marché** (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 \$ au Canada plus 7,70 \$ de TPS et la TVP en vigueur, 132 \$ US aux États-Unis et 154 \$ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division des Opérations et de l'intégration, Direction de la circulation, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication. Via l'Internet: order@statcan.ca
